## END OF THE SCHOOL YEAR CELEBRATION

Last Saturday, our school organized the annual end of the school year celebration. All the classes presented their dancing programs. It was a sunny day and the presentation began in the afternoon and ended at night. Most of the people liked our programs and enjoyed our presentation a lot. From the other programs we think our rhythmic gymnastics group was the best one! We liked the costumes and the themes our teachers decided a lot. It was an unforgettable experience!

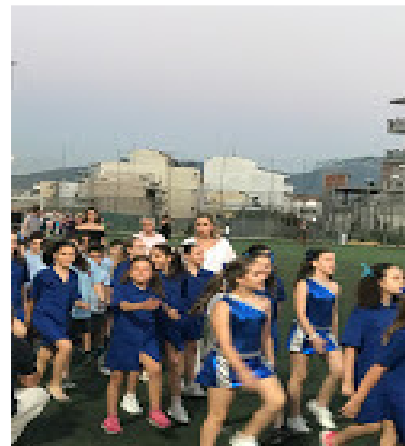

Dear friends

Last Saturday, our school organized athletic games as usual. We went to the stadium of N. Iraklion, at 8 p.m. Our class took part in the races and potato sack races. I was the starter. I was holding a horn at the starting point. We won the races, and I am very happy. We had a lot of fun.

Have a nice summer!

By the 4<sup>th</sup> grader Marios Vavourakis

By the 4<sup>th</sup> graders Melina Tsega & Charis Mouroutsou

Gymnastic concert was at the 9<sup>th</sup> of June, 2018 we had a great time. When my class and I started to dance it was great. We made some mistakes but it didn't matter. All dances were amazing. All classes were awarded with medals and olive branches.

By the 5<sup>th</sup> grader Boura Dorothy

Every year our school organizes a spectacular athletic and entertaining event. This event take place at the Iraklion Municipal Stadium. All the pupils are gathered outside the tennis court. After a while the pupils made a parade in front of their parents and teachers. The students who took part in academic and sport competitions are awarded medals and are given prizes. Then, each class presents choreography to their parents' friends and relatives who came to see them. At the end of the event there is a graduation ceremony dedicated to the students of year 6. It is a very touching moment!

By the 5<sup>th</sup> grader Efthimis Papanikolaou

Dear school, colleagues, friends,

Another school year has come to the end and we celebrated it on Saturday evening at the gym show.

That day, for me and for all the children of the sixth grade it's not just the end of a year but the end of our childhood. Next year will find us in another school and we will inevitably separate. This is why this evening was very special because for us it was a touching farewell celebration. That night we sang, danced, embraced and cried for this end time. I'll remember that night with love and I hope we will keep in touch so as no one forgets one another.

I wish to everyone to make their dreams come true.

**Good luck to everyone!**

With love Irene Vavouraki

*Our special graduation day from primary school*

This was our last year of primary school and I can tell that it was full of emotions. We had six wonderful years and we couldn't leave this school without organizing a special graduation day!

So this day started with a parade on the field of Green hill in Iraklion. There, we sang a

beautiful song named "Bye Now" and as soon as the song finished our head teacher gave to each student a necklace in which it was written "Graduates 2018". We also wore black graduation caps. Wearing these two, we watched in video wall several photos from the first class up to now. There were photos from our gymnastics demonstrations, our excursions, our bazaars with lemonades and our theatrical activities.

It was impossible for us not to cry in the view of all these photos and memories. However, I feel lucky and excited that my parents have chosen this school from which I made not only good friends but I also met inspiring teachers that prepared us for tomorrow's challenges!!!

By the 6<sup>th</sup> grader Masoura Konstantina

***Our Rhythmic Gymnastics Competitive Team Program***

***"The Evolution of Man"***

Once again, the Rhythmic Gymnastics Competitive Team of our school, under the

direction of Mrs. Christina Psarakes , amazed the audience with this year's program, inspired by human evolution and performed splendidly by the members of the team.

The spectacular choreography, accompanied by a highly dramatic soundtrack, and the perfectly performed routines of the athletes kept everyone on the edge of their seats during the whole performance.

In front of our eyes passed the history of man, starting with Pre-historic times and touching the technologically advanced present, in a way that celebrated not only the miracle of human life but also the expressiveness of human body and its capacity to tell the saga of who we used to be and who we are in the most comprehensible way.

***"I'm so happy"***

Once again, we are all gathered at the stadium of Iraklion to celebrate the end of the year! This time, the starting point was not the pupils' parade but their song and dance "I'm so happy!" All the younger classes including Kindergarten, the first, second and

the third graders danced and sang the song "I'm so happy!" Their energy lifted our spirits and made us look forward to watching the rest of the show! They were happy and excited and so were we!

The 5th and the 6th grade students were the last ones that took part in the final show presenting their unique part called "The pace of our lives". This dance was the one which actually closed the whole festival receiving the parents' applause and enthusiasm.

It was a really difficult project for both teachers -Miss Nadia Papailiopolou and Thodoris Moutzouris - who were in charge of the preparation of this part of the show to ordinate such a big number of students. Due to the kids coordination and the teachers' help the result was outstanding and everybody enjoyed it.

At the end of their show, the graduates of our school sang two inspirational songs that had been prepared with their Music teacher's assistance, Miss Eleftheria Voulgari .

The most impressive part of the festival was the fireworks display which lit the night sky with all the colors of the rainbow in an effort to make it a memorable event for our graduates.

One after the other, all the pupils took turns and were given their graduation-hats and titles. Graduating from the primary school is a unique experience, when all the children felt excited, sad and everything in between. A slide show with the most important events of their years at our school was presented and filled our hearts with nostalgia and memories that will last forever. All the things that they

have learned ,the experiences that they have had and the friends they have made along the way passed in front of their eyes ,accompanied with a really moving soundtrack . Throughout the time at our school , the students have grown as people, met friends that will last a lifetime ,and experienced things that will never forget. This bittersweet feeling is absolutely normal but one thing is for sure. You must be very proud of yourselves and the things you have accomplished so far. We wish you all the best!

## SPRING BAZAAR

At our school, that it is ELLINOAGLIKI AGOGI we had a bazaar on the 5<sup>th</sup> and 6<sup>th</sup> of May 2018.

At the bazaar there was lots of fun stuff to do! There were many things to buy there, too! Our bazaar was for charity and every class prepared some things to sell.

The students of the sixth grade, class ST2, sold some homemade lemonade that their mothers prepared and they helped too! Our class that was D1 sold bags that we had drew on. The other two classes of D2 and D3 did the same thing. Other classes sold jewellery, mirrors, sweets and plants.

In the schoolyard there were many games. The children had fun jumping on the trampoline. They tried climbing on a wall and they took part in a football and basketball competition. In our school's Theater there was a "programme" that the students could learn how to make music with their mouths and with different objects that's called "BeatBox". While they were listening to their music they were also moving in the same rhythm.

Our school collected a lot of money for charity organizations. The children had fun and noticed that they were helping people in need at the same time.

We thought the same thing as well.

By the 4<sup>th</sup> graders Eleni Bofou & Irida Fili

**ATHENS SCIENCE FESTIVAL**

In the physical festival, there were a lot of children from different schools. We learnt a lot of new and interesting things about Physics. Some children explained how we can use electronic things. After that, we went to see some experiments about the air and the ice. Moreover, we saw a presentation about the biggest physical laboratory. Finally, we played a game about the electrons how they can transport from one magnet to another and what happened when they are collided between them!

By the 5<sup>th</sup> grader Alexandros Drogoulis

We visited the third **Athens Science Festival** in Technopolis Athens, Gazi. At first we entered a huge hall. There were lots of desks and each of them with a different theme. For example there was a desk with a lego basket. It was a basket made of lego. In that game you had to put the ball (made of lego) in the basket. Then we went outside. There were different stands with experiments. For example there was a stand of Planet Physics or of the Association of Greek Physics. At the end of the trip we went to another room where we saw a video about CERN, the most important European research organization. CERN is located in Geneve, the capital city of Switzerland.

I think this school trip was amazing and I hope that this festival will be organized next year too.

By the 5<sup>th</sup> grader Panagiotis Tatsis

On 25th of April my class and I went to the Athens Science festival where we had the opportunity to see experiments, stalls with inventions and a Cern presentation about protons. In one stall there was a Lego basketball competition and I was the fortunate one to win a prize; -40% off to STEM education programs, some of my friends won prizes too! But I was the first girl that won and that's why I got the biggest prize. Our school trip was great and I liked it.

By the 5<sup>th</sup> grader Elena Mpregianni

## GREEK ISLANDS

Hydra is one of the most dynamic and exciting Greek islands. It is located in Saronic sea near Peloponnese and Spetses island.

It is a very popular and famous place because of its looks, like an art-paint, with grey, white and blue colors above the blue of the sea. That's why thousand of tourist visit the island every year. There are no cars and motorbikes and transportation take place with donkeys.

It's is famous also for the cosmopolitan and intense day and night life and the its history.

**By the 5<sup>th</sup> grader Orestis Beratis**

Santorini (or Thíra) is a group of islands and a part of Cyclades. Santorini island is still an active volcano and probably the only volcano in the world whose crater is in the sea. The last big eruption occurred 3,600 years ago (during the Minoan Age). Santorini is considered to be the most romantic place in Greece. Firá is the capital of the island and it looks like a painting. A famous village is Akrotíri with its archaeological site. Some famous traditional products are cherry tomatoes, fava, caper and "hlorotyri", a special kind of fresh goat cheese.

**By the 5<sup>th</sup> grader Evelina Karagianni**

## Chios

Chios is the fifth largest of the Greek islands, situated in the Aegean Sea, 7 kilometers off the Anatolian coast. The island is separated from Turkey by the Chios Strait. Chios is notable for its exports of mastic gum and its nickname is *the Mastic Island*. Tourist attractions include its medieval villages and the 11th-century monastery of *Nea Moni*, a UNESCO World Heritage Site.

Administratively, the island forms a separate municipality within the Chios regional unit, which is part of the North Aegean region. The principal town of the island and seat of the municipality is Chios.<sup>[2]</sup> Locals refer to Chios town as "Chora" ("Χώρα" literally means land or country, but usually refers to the capital or a settlement at the highest point of a Greek island).

It was also the site of the Chios massacre in which tens of thousands of Greeks on the island were killed by Ottoman troops during the Greek War of Independence in 1822.

## Santorini

Santorini is an island in the southern Aegean Sea, and it is the remnant of

a volcanic caldera. It forms the southernmost member of the Cyclades group of islands. Santorini is essentially what remains after an enormous volcanic eruption that destroyed the earliest settlements on a formerly single island, and created the current geological caldera. A giant central, rectangular lagoon, which measures about 12 by 7 km, is surrounded by 300 m high, steep cliffs on three sides.<sup>[4]</sup> The main island slopes downward to the Aegean Sea. On the fourth side, the lagoon is separated from the sea by another much smaller island called Therasia; the lagoon is connected to the sea in two places, in the northwest and southwest. The island's principal port is Athinios. The capital, Fira, clings to the top of the cliff looking down on the lagoon.

It is the most active volcanic centre in the South Aegean Volcanic Arc, though what remains today is chiefly a water-filled caldera. The volcanic arc is approximately 500 km long and 20 to 40 km wide. The region first became volcanically active around 3-4 million years ago, though volcanism on Thera began around 2 million years ago with the extrusion of dacitic lavas from vents around the Akrotiri.

## Ithaca

Ithaca is located in the Ionian Sea, off the northeast coast of Kefalonia and to the west of continental Greece.

Ithaca's main island has an area of 96 square kilometres. It is the second-smallest of seven main Ionian Islands, after Paxi. The capital is Vathy (or Vathi).

Modern Ithaca is generally identified with Homer's Ithaca, the home of Odysseus, whose delayed return to the island is the plot of the classical Greek tale the *Odyssey*.

## Alonnisos

Alonnisos is a Greek island in the Aegean Sea. After Skiathos and Skopelos it is the third member of the Northern Sporades.

The village of Alonnisos is located on the southern part of the island. It is locally known as Chora and signposted as The Old Village. The main port of the island is located in the southeast and is called Patitiri. The bay at the southern end of the island is also called Alonnisos.

The Municipality of Alonnisos includes the nearby islands of Adelfoi, Gioura, Kyra Panagia (Pelagos), Peristera, Piperi, Psathoura and Skantzoura.

By the 5<sup>th</sup> grader Zeta Karagouni

## UNUSUAL FOODS AROUND THE WORLD

### The egg of the Millenium

The Chinese maintain the eggs in a mixture of lime, salt, white mud, rice and clay oats for several weeks or months. The smell of such a food is particularly intense, but that doesn't seem to bother the Chinese.

## Tripe

Also known as the soup of the nightlife, since it is a classic choice of many in the early morning hours and after a great excursion. It is considered a hangover remedy. Usually you make it with pork belly and legs. It's no wonder that some people find it odd. It's up to the person. Some people don't just try it but they like it ,too.

By the 6<sup>th</sup> graders

## The Little Cook

My favorite restaurant is *The Little Cook*. It is in Psiri. It is a fantastic restaurant. Every three years they change the décor. This period the theme is the Caribbean. Anyone can see Jack Sparrow, a very big octopus, a beautiful, brightly colored mermaid, Neptune and a large parrot. There are also many colors and some maps on the walls.

The waiters all wear a pirate outfit and hats with wings on. The music is cool. You can hear pirate music.

The food is really special. It is decorated with mini umbrellas, with many colors and different types of exotic fruit.

The prices are good. A dish costs about eight Euros.

*The Little Cook* is my favorite restaurant and I think that anyone who will choose to go there will have a wonderful time.

## Original Dalmatian Snow Cookies

Ingredients:	Instructions:
<ul style="list-style-type: none"> <li> black sugar 200 grams</li> <li> couverture drops 100 grams</li> <li> vanilla powder 1/2 tea spoon</li> <li> 4 tablespoons of cocoa</li> <li> 1 egg</li> <li> white choco drops 100 grams</li> <li> baking powder 1 tablespoon</li> <li> flour (all uses) 150 grams</li> <li> butter 120 grams</li> <li> sugar snow powder</li> </ul>	<p>Put 120 grams of butter and 200 grams of black sugar in the blender bin and beat them for a few minutes.</p> <p>Pour the egg and continue the beating for 2-3 minutes. Add the vanilla, baking powder, cocoa and flour.</p> <p>Scrap and drop the drops of couverture and white chocolate.</p> <p>Divide the mixture into a baking dish with a spoon.</p> <p>Bake in a pre-heated oven at 180 degrees for 10-12 minutes.</p> <p>Let the cookies cool down and remove them from the pan. Sprinkle with sugar snow powder and enjoy!</p>

## CAMBRIDGE SHORT STORY COMPETITION

A number of Year 3 students participated in Cambridge Story Competition. The students were motivated to participate by reading a story. Actually they have already read and watched a number of stories in English. However, they've never written a story before. So, they tried to find out the necessary ingredients for a story. Then they planned and they wrote original stories. They also had the chance to illustrate their stories.

According to a Cambridge newsletter they had entries from all over the world and the stories had been truly fascinating to read. It had been a tough decision to make as there were so many wonderful entries. However, they have managed to pick 12 winning stories. One of them belongs to a Greek student, Donna Levantakis. The title of her story is: "Mr Triangle." The judges would also like to award special mentions to another Greek entry that of Popi Gerontidou - "The grumpy ingredients". You could find out the names of the winners by visiting the following site:

<http://www.cambridge.org/elt/blog/2018/06/01/cambridge-story-competition-winners-announced/>

We would definitely like to congratulate all of our students for their participation and enthusiasm. We consider that they really enjoyed the story writing activity and were inspired to continue creating stories.

Here you have the chance to read our students' short stories. Enjoy them!

**OUR FUTURE CITY - BRITISH COUNCIL  
COMPETITION**

**NEW SUBATLANTIS**

An imaginary city of the future  
Earth 3000 A.D.

**The world needs great stories!**

Now, you're ready to write and draw your story!

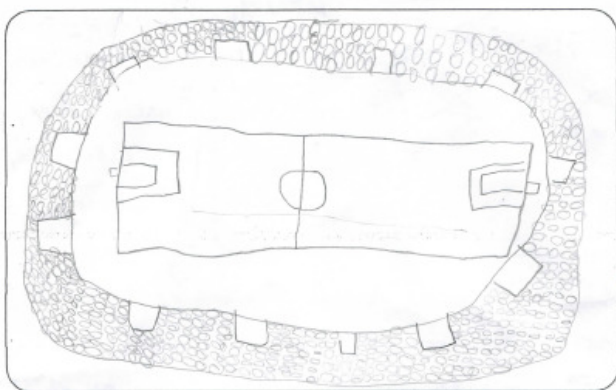

When ice melted on Earth, humans had to find ways to survive, so they created cities beneath the water. We are presenting you one of them, New Subatlantis.

The buildings are much higher than we know. They can house hundreds of thousands of people. Humans move on special sub vehicles under water, using environmentally friendly fuel. These vehicles are faster than the speed of sound that is supersonic, so anyone can go wherever they need and wherever they need.

**The world needs great stories!**

Now, you're ready to write and draw your story!

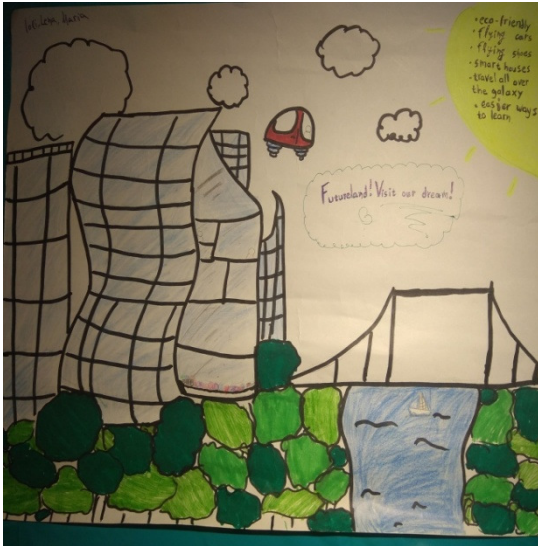

People here do not worry about sea creatures because a dome protects the sub-environment. The dome provides oxygen to Subatlantis. The people of Subatlantis do not have to worry about thieves, either, because crime does not exist here.

The inhabitants try forms of entertainment like scuba diving, snorkeling and underwater fishing.

«A match to remember...»

## FUTURELAND

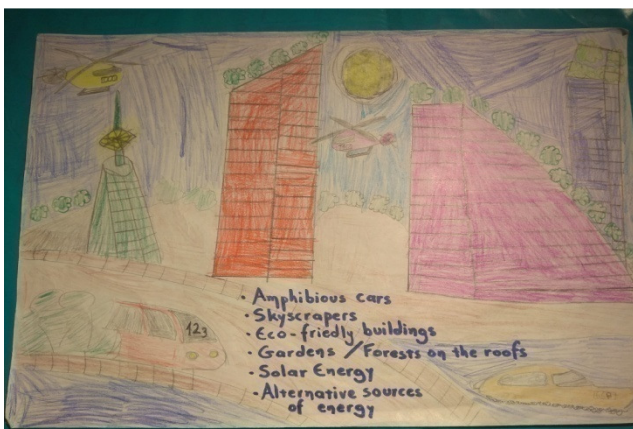

Futureland will be much different than our city today. It will have smart houses and you will be able to give orders to the house, like: "Turn on the lights" and it will react.

The houses will also recognize you so that they will not let anybody else get in!

From Futureland you will be transported all over the galaxy on flying shoes. And don't worry! You will discover easier ways to learn! Of course we will be very friendly to the environment so everything in our city will be eco-friendly!

By the 5<sup>th</sup> graders Ioli, Lena & Maria

## MY FUTURE CITY

My city will have developed a lot over the next few decades. We will not have cars but we will have amphibious cars, which will be able to both float on rivers and move on land. There will be no short buildings but there will be sky scrapers. All of our buildings will be environmentally friendly. That's because all of

the buildings will have a garden or even a small forest on their roofs. Of course, all means of transportation will use solar energy or other alternative sources of energy.

By 5<sup>th</sup> graders G. Mologianis, S. Mastorakis, F. Charos -Maris, O. Mitsaras, A. Papakonstantinou-Peristerakos

## Imagining the city of the future

Welcome to the city of your dreams here in the Land of the Future, where technology is at its highest point. Cars can now fly, humans can breathe in gases like hydrogen and carbon without any problems.

Come to the city of the future, where the only limitation is dull imagination. So, come with us and create, help the community, discover and learn things in seconds, join your dream job. No more wars, and since the cars and the buildings are made of solid grapheme, a material stronger than a diamond, explosions won't be something to worry about anymore. Vents will also clean up the area of harmful gases.

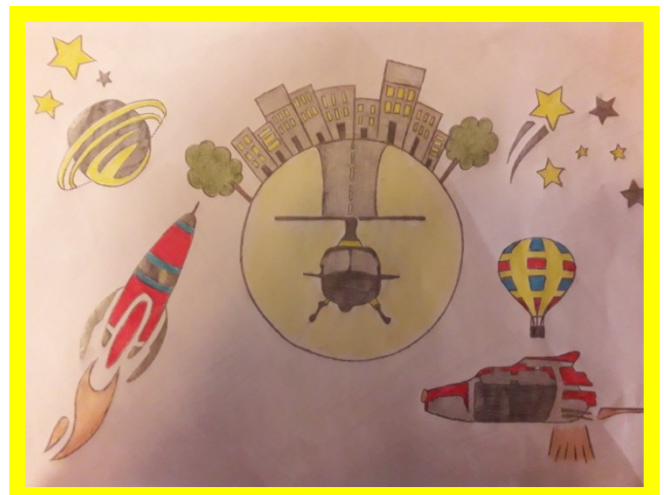

By 5<sup>th</sup> graders E. Iatrou, S. Raptakis & M. Lambropoulos

## Facts about our city of the future

1. There is no oxygen because humans are genetically modified, so, instead of oxygen, they can breathe in other gases like hydrogen, carbon and more.
2. The city is on the surface of Mars so scientists can continue the search for life on Mars.
3. The city is elevated because at a certain height the pressure is the same as that on Earth, which makes it possible to go outside without anti-pressure suits.
4. The power source is nuclear energy because 1 gr. of uranium generates as much power as do 1,500,000 tons of coal, making it a possible infinite power generator.

5. People are able to reach speeds of 177,000 km/h because scientists have found a material which has four times the positive charge of a normal one, so we can get past the Colom Barrier at 44,670 km/sec.

## PROJECTS - KINDERGARTEN

This last year we began our journey in English together, we played, we sang, we danced, we learnt. It was only the beginning. Leaving now, a year older and wiser, I hope that what you have learnt will accompany you throughout your life. I am proud to have been your teacher...

Here are a few snapshots of our final days in class.

## PROJECTS - A' CLASS

CLIL Year 1

Over the past semester we have dealt with quite a few topics: matter, plants, and animals to name a few.

We became scientists, actors, athletes and learnt through doing what the world around us consists of.

This creative journey has been put on hold with the end of the school but will continue anew next year with many more projects, experiments and laughter. Until then, have a beautiful and relaxing summer.

## ***A Cross curricular Project by A' class***

"A golden friendship for everyone, Adventures in the North Pole, The Polar Bear and the penguin, Two inseparable friends "

Taken the initiative by the teacher of Music, the first graders worked on a very creative and special Project creating three different stories! The concept of the stories was taken by the teachers of the classes. It didn't take them much time to think and create three wonderful fairytales with happy endings and meaningful themes! The stories were translated in English by the teachers of English language and were later narrated by the pupils! They also made wonderful drawings based on the themes of the stories which were then animated by the teacher of Art. The outcome was inspiring and the pupils were really happy to see their work accomplished so well.

You can watch this brilliant work by following the links:

<https://www.youtube.com/watch?v=5udNWqh158Q>

<https://www.youtube.com/watch?v=RUwVPM45hIE>

<https://www.youtube.com/watch?v=eRxq3EpD7bE>

You can also read the stories as they follow.

### ***The Polar Bear and the Penguin, two Inseparable Friends!***

Once upon a time a Polar Bear lived at the South Pole. It lived all alone in a frozen cave.

It was as white as snow. Every day the Polar Bear did something very nice. It somersaulted and dived vertically from high icebergs into the sea. It liked rolling about on the fresh, powdery snow. It usually speeded and performed

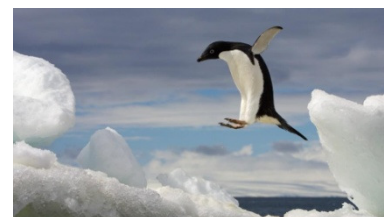

backward rolls like an acrobat and cartwheels like a dancer. It threw snowballs on the frozen lake of the Antarctic.

It was looking for the rarest fish under the ice in order to eat it up. When it was getting dark the bear was going back to its cave. It used some snow to make its pillow. Then it went to sleep. However, day by day it felt so lonely! It wanted to find a friend and it wasted no time. One day early in the morning it went deep diving in order to meet a deep sea creature. The fish that saw the polar bear were very scared because of its large body. So they ran away. However, our Polar Bear didn't quit. It went on swimming around the sea bed. While it was swimming it saw a huge round black shadow quite far away. It went close and it was really surprised to see a small penguin. It had got stuck between two lumps of ice and scared as it was, it was shouting for help. The Bear realized that it had found the friend it was looking for. It used two of its legs to push the ice and put the penguin gently on its back. Together they went back to the cave and they hugged each other in order to warm up. Since then they became best friends. They also built a big ice castle. They used a lot of penguins and bears made of snow to decorate it. Everyone lived happily ever after. They realized how nice it is to have friends. If you have friends you feel much better.

### ***Adventures in the North pole***

Once upon a time, there was a little penguin Lakis. Lakis lived with his mum in the North Pole. A very cold morning, the penguins were looking for food in the snowstorm. While

walking they were leaving traces to find their way back.

Suddenly, there was a strange noise. The earth started creaking and the ice broke. The two penguins got scared and started hopping on the ice pieces, screaming. At last, they sat on a solid piece of ice to get

some rest. Then, they heard a voice saying: "I'm Flake, the little Snowflake." The little penguins turned their heads to see a dirty snowball." "Why are you like this?" they asked. "I was carried away by the wind and fell into the water. "So, I melted a bit" said Flake. But I got lucky when a big wave threw me up here."

While they were talking they saw a big white thing coming. It was Lilly, a cute polar bear that had lost her home by an avalanche. Lilly was moving her legs fast as she was swimming. The mother-penguin, had an idea! "At the end of the ocean, there is the Queen of snow."

"We can go to her and meet her, she can help us!"

"What do you think?" asked the mother-penguin.

"Ride on my back. I will take you there." said the bear

So, everybody rode on the bear's back to go the queen's palace. There the queen using her magical powers. She made an igloo for the bear. She made Flake nice and bright. She sent everybody back to the igloo. Everybody sat round the fire, eating fish and fish-ice cream and drinking fish-juice. They looked at each other smiling and they all said together "Together we can do anything! One for all and all for one!"

By class A2

### *A golden friendship for everyone*

Once upon a time there was a penguin in the North Pole. Every morning he woke up he slid joyfully with his tummy on ice to catch some fish. After that he played in the water performing high rolls and every noon very noon he took a nap. In the afternoon he played

with icicles and liked to ski on them. The penguin lived alone. He had no one to keep him company and felt lonely. One day he decided to go for a walk to find a friend. On his way

he met a polar bear which did something really strange. With her crooked and sharp nails she scratched the ice. Suddenly, a loud scratch was heard and the ice broke into many pieces. The bear took the pieces put them together and made a slide. The penguin asked the polar bear to be friends and she said yes because she wanted to have a friend too. They went on the slide together. On top of the slide, they broke the ice, and they fell together in the frozen water. The polar bear took the penguin on her back and climbed to get out of the water. Then they made two crystal fishing rods and started fishing. The penguin caught a fish but it pulled the rod hard to escape. The fish finally managed to escape. The two friends were disappointed and stopped fishing. They walked and met a smiley snowman. He was chasing an Eskimo. The Eskimo slipped, fell on the ice and hurt himself. That made everyone laugh. He was fine so they all went to the Eskimo's house together. There, they played table games. The penguin gave fish to everyone. They were all happy because no one was alone anymore.

## PROJECTS - B' CLASS

### CLIL Year 2

Summer TIME	
Every <b>a</b> ccomplishment	starts with the decision to try. (GAIL DEVERS)
Being different is one of the most <b>b</b> eautiful	things on earth. (UNKNOWN)
<b>C</b> reativity	is intelligence having fun. (ALBERT EINSTEIN)
The surest way not to fail is to <b>d</b> etermine	to succeed. (RICHARD BRINSLEY SHERIDAN)
The <b>e</b> xpert	in anything was once a beginner. (HELEN HAYES)
The best way to predict the <b>f</b> uture	is to create it. (ABRAHAM LINCOLN)

These past couple of years have been a journey of discovery, as, together, we explored the world around us. We have grown,

feeding our curious minds with even more questions than we have answers for! This is what makes us improve upon what we already know and strive to uncover new knowledge... in the hope that you may never stop asking questions! It has been an honor to be your teacher, you have truly inspired me.

### ON PARLE FRANÇAIS

#### Les poètes d'été

Le lundi je suis petite  
 Le mardi je suis tranquille  
 Le mercredi je suis heureuse  
 Le jeudi il y a de la neige  
 Le vendredi c'est parfait

Have a beautiful summer!

Le samedi c'est extraordinaire  
Le dimanche j'adore la mer.

**Στελλίνα Νάσση Δ'3**

Bonjour «Été» ! Bonjour !  
Ça va «Été» ! Ça va !  
L'été est parfait  
près de la mer !

**Μελίνα Καρακυριάκου Δ'3**

Bonjour!  
Je m' appelle Ino.  
Je viens de la maison.  
J' aime la gymnastique  
mais je déteste le tennis.  
J'adore l' histoire  
mais pas la géographie.

**Ινώ Ξεμαντήλωτου Ε'1**

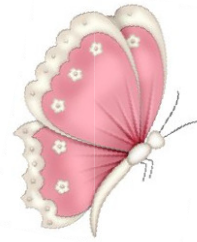

Le basket est facile  
mais le foot difficile.  
On adore les maths  
mais pas la géographie.  
On aime le samedi mais on déteste

le lundi.

On joue à l'élastique mais pas au tennis.  
L' août est «plaisir» mais le septembre  
«ennui».

**Αλέξανδρος Ντρογγούλης,  
Χρήστος Γούλας,  
Παναγιώτης Καραΐσκος &  
Μάριος Λαμπρόπουλος - Ε'1**

On traverse la rue d'été.  
À gauche, à droite c'est la même rue  
enfin.

C'est facile de trouver les copains  
que tu aimes  
mais difficile se décider à tous ces  
que tu veux.

**Άννα Καραθάνου, Αναστασία Κώνστα,  
Έλενα Παπαγεωργίου & Ινώ Ξεμαντήλωτου - Ε'1**

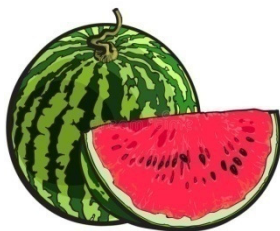

Ma tortue est sportive.  
Elle porte un pull vert.  
Elle est jolie.  
Elle aime la glace à la vanille.  
Elle adore sa famille  
et elle joue à l' élastique.

**Τσιγιάννη Μαρίνα, Ματθαίου Γεωργία &  
Ζορμπά Δέσποινα - Ε1**

En décembre les gâteaux.  
En janvier les cadeaux.  
En février on danse  
et on joue à la console en mars.  
En avril, on joue au Scrabble  
tous ensemble.  
En juin on joue, enfin,  
avec tous les copains !!!

**Μολογιάννης Γιάννης, Μπεράτης Ορέστης &  
Ταουκτσής Μάνος -Ε3**

Je m'appelle Dimitris.  
J'ai une perruche.  
Je m'appelle Dionysis.  
J'ai une souris.  
Je vais tout près.  
Je me couche après.  
J'adore les français  
mais aussi j'adore manger.  
Je mange et après je nage dans la mer qui est  
bleue.  
Aujourd'hui, je mange du riz.  
Je veux de l'eau.  
J'ai un chat. Il est beau.  
J'aime les pâtes  
à la sauce tomate.  
Je suis en 5<sup>e</sup> du primaire  
et j'adore la mer !!!!!

**Δημήτρης Ρούσσοσ & Διονύσης Βορπίσης - Ε1**

**14 Juillet**

Le 14 juillet est la fête nationale de la République française et un jour férié en France.

Le 14 juillet mêle parades militaires, bals populaires, concert lyrique en plein air, et surtout, feux d'artifice qui fleurissent dans toute la France.

Ce spectacle pyrotechnique de haut vol est chaque année très attendu. Durant 30 minutes, la tour Eiffel devient le theatre d'un show qui rassemble petits et grands, parisiens et tourists.

Chaque année la date de cette fête symbolise la véritable entrée dans l'été et les vacances scolaires ( quelle joie!!!!!!).

Vaso Katsika, St'2

## WIR SPRECHEN DEUTSCH

### Meine Lieblingssänger

Zwei von meinen Lieblingssängern sind Zwillingenbrüder Marcus und Martinus Gunnasern. Mein Lieblingssänger ist Martinus. Er kommt aus Norwegen und ist sechzehn Jahre alt. Er singt seit sieben Jahren mit seinem Bruder Marcus. Ihre Lieder sind sehr gut und ich finde sie fantastisch.

Martinus ist groß und schlank und sehr sportlich. Seine Haare sind blond und seine Augen braun. Er ist süß, intelligent, freundlich, lustig und interessant. Er spielt Fußball und Basketball und er kann Klavier, Gitarre und Schlagzeug spielen. Das sind meine Lieblingssänger.

Chorafopoulou Michaela, Klasse 6a

### Ferien in Griechenland!!!

Griechenland - das heisst Ferien für alle! Die einen freuen sich auf viel Sonne, griechisches Essen und süßes Nichtstun am Strand, die anderen auf historische Kulturschätze und abwechslungsreiche Landschaftsbilder. 227 der über 6000 Inseln Griechenlands sind bewohnt - und die Schönsten davon haben wir für Sie ausgesucht: Jede hat ihre eigenen Schönheiten - aber allen gemeinsam ist die grosse Gastfreundschaft der Bevölkerung. Griechenland: Land der Inseln, wie von Götterhand ins Meer gestreut.

Die Wiege Europas betört die Sinne mit blühenden Zitrusbäumen, duftendem Thymian, zirpenden Zikaden im Olivenhain - dazwischen tausendjährige Ruinen: Fundamente der abendländischen Kultur. Von Athen, dem Zentrum des antiken Denkens, über das vulkanische Santorin oder das blendend weisse Mykonos reiht sich eine Perle an die nächste. Das Meer erstreckt sich tiefblau bis zum Horizont. Pittoreske Dörfer schmiegen sich an die Hügel. Mediterrane Delikatessen unter freiem Himmel kosten, gefolgt von einem Glas eiskalten Ouzos. Sich Zeit nehmen: für Gespräche, für fröhliches Beisammensein, für Genuss und Spiel. Griechenland ist mehr als ein Land - es ist ein Lebensgefühl.

Kosmopolitische Atmosphäre, eine schillernde Barszene, ausgelassene Strandpartys - auf Mykonos trifft sich im Sommer der internationale Jetset und macht die Nacht zum Tag.

In der hübschen Altstadt von Mykonos-Stadt laden zahllose Restaurants, Bars, Strassencafés und Geschäfte zum Bummeln und Feiern ein. An den berühmten Stränden Paradise und Super Paradise tanzen

Feierfreudige bis die Sonne aufgeht und an den Häfen reihen sich die Luxusyachten. Doch die Insel hat auch ein anderes, weniger bekanntes Gesicht: Entdecken Sie strohgedeckte Windmühlen in malerischen Landschaften, kosten Sie inseltypische Spezialitäten wie den Pfefferkäse Kopanisti, luftgetrocknete Würste mit Kräutern oder köstliche Mandelbiscuits in pittoresken Dörfern.

Stolz und freiheitsliebend sind die Kreter, genauso wie die rauen Berge, die sich längs über die grösste griechische Insel ziehen. Stolz sind sie zu recht: Immerhin war Kreta das Zentrum der minoischen Hochkultur, die grossartige Paläste hervorbrachte.

Schroffe Schluchten, farbenprächtige Wildblumen, ja sogar Chamäleons: Auch die Natur Kretas hat einiges zu bieten. Und natürlich ist die südlichste griechische Insel für ihre kilometerlangen, herrlichen Strände bekannt. Malerische Städte wie Chania oder Rethymnon mit pittoresken Gassen und gemütlichen Tavernen, sowie ein reges Nachtleben, etwa in Chersonissos oder Malia, runden die kretische Vielfalt ab.

Korfu hat viele Gesichter: Traditionelle Bergdörfer, idyllische Lagunen und unerschlossene Küstenstreifen finden sich neben Touristenstränden mit breitem Unterhaltungsangebot.

Die Einflüsse der verschiedenen Eroberer prägen die Insel: In Korfu-Stadt etwa haben die Italiener prächtige venezianische Gebäude hinterlassen, die Briten einen Palast aus maltesischem Kalkstein und die Franzosen elegante Arkaden. Kaiserin Elisabeth von Österreich, bekannt als «Sissi», liebte diese Insel. In ihrem Schloss südwestlich von Korfu-Stadt erholte sie sich jeweils vom anstrengenden Leben am Hof.

Kassandra, Sithonia und Athos ragen weit ins Meer: Drei schmale, lange Finger an der Hand von Chalkidiki. Halbinseln — gleich geformt, von unterschiedlichem Format.

Kassandra, die touristisch Entwickelte; mit endlos, langen Sandstränden und einem grossen Angebot für Nachtschwärmer; Sithonia, die wilde Schöne; mit überwältigender Natur und kleinen, versteckten Buchten. Athos, die ruhige Würdevolle; grösste Mönchsrepublik in Europa und nur erwachsenen Männern vorbehalten. Egal für welche Region Sie sich entscheiden: Das Meer präsentiert sich türkisblau und kristallklar, vielfach ausgezeichnet mit der «Blauen Flagge» für hervorragende Wasserqualität.

Grün, blühend, fruchtbar — Kos trägt den Beinamen «schwimmender Garten» nicht umsonst. Von Tamarisken, die Salzwasser vertragen, über üppig blühenden Oleander und duftenden Thymian bis zu Granatapfelbäumen gedeiht auf Kos alles.

Die Inselhauptstadt Kos-Stadt, überragt von einer Kreuzritterburg, ist berühmt für ihr reges Nachtleben: Besonders im Altstadtviertel zwischen dem Mandraki-Hafen und dem antiken Marktplatz reihen sich Discos, Bars und Tavernen, die sich häufig erst nach Mitternacht füllen. Doch Kos'

grösstes Kapital sind die traumhaften Sandstrände: flach, feinsandig, kilometerlang – dazu kommt eine perfekt ausgebaute Ferieninfrastruktur und ein breites Wassersportangebot.

Die Insel in der östlichen Ägäis ist bekannt für ihren süssen Wein, die Naturbuchten mit Sand- und Kieselstränden und die malerischen Hafenstädtchen. Historischem begegnen Sie hier ebenso: Eines der Hauptheiligtümer der Göttin Hera befand sich auf Samos.

Süsser Muskateller-Wein, aromatisches Olivenöl, frische Meeresfrüchte – auf Samos kommt der Genuss bestimmt nicht zu kurz. Dabei bleibt viel Zeit zum Nachdenken. Kein Wunder, hat Samos zahlreiche Philosophen sowie den berühmten Mathematiker Pythagoras hervorgebracht. Die malerischen Weinberge, Pinienwälder und ursprünglichen Dörfer laden zu herrlichen Wanderungen ein. Und natürlich sind da noch die flach abfallenden Strände, die Samos zur Badeferieninsel prädestinieren: weitläufig, familienfreundlich – traumhaft.

Santorini, eine Insel für Ästheten und Weinliebhaber: Schwarze Strände, blaue Dächer, weissgetünchte Häuser und – vulkanischer Boden: Beste Grundlage für einen Spitzenwein, der seinesgleichen sucht.

An der Ostküste ziehen sich sanft abfallende, fruchtbare Ebenen bis an die schwarzen Strände hin. Im Westen, hoch oben am Rand der Kraterwand, legen sich malerische Dörfer, etwa Imerovigli oder Oia, wie weisse Bänder an den Fels. Die Häuser sind auf inseltypische Art in den Fels gehauen, weissgetüncht und mit Treppen verbunden. Würdevoll thront das Wahrzeichen Santorinis, die Kirche Agíos Minás mit ihren

weissen Mauern und leuchtend blauen Kuppeln über dem Meer.

«Blume des Ostens» nannten die Venezianer Zakynthos. Über 400 Jahre besetzten sie die Insel und gaben sie nur ungern wieder her. Kein Wunder: So grün wie Zakynthos ist kaum eine griechische Insel.

Ihre malerischen Bergdörfer, fruchtbaren Ebenen und vor allem die goldfarbenen Sandstrände verleihen der Insel paradiesische Reize. Das richtige Umfeld, um das Leben zu geniessen. Nachtschwärmer zieht es an den herrlichen Sandstrand in der Bucht von Laganas. Doch der Strand ist nicht nur bei Menschen beliebt: Er gilt auch als einer der wichtigsten Mittelmeer-Brutplätze der Unechten Kareschildkröte, die im beeindruckenden Meeresnationalpark vor Zakynthos' Küste leben.

An einem Strand des Peloponnes stand einst Pelops, Namensgeber der Halbinsel und Günstling der Götter, und rief Poseidon um Hilfe. Der Herrscher der Meere sandte seine Pferde aus den Fluten, um dem Flehenden zu helfen.

War es in Nafplion? In Skafidia? Auf dem Peloponnes wandeln Sie überall auf mythologischen Spuren. Strände, Schluchten, Berge – Kulisse für jahrtausendealte Legenden. Olympia, Korinth, Mykene – Überreste antiker Hochkultur. Klassisches Altertum und moderner Hotelluxus, sonnige Strandtage und historische Ausflüge – diese Mischung bestimmt Ihre Ferientage.

Zu Recht zählt sie mit ihren über 3000 Sonnenstunden im Jahr, kilometerlangen Sandstränden und den türkisfarbenen Buchten zu den Sonne, Sand und Meer prägen

das Image der Insel Rhodos, attraktivsten Badedestinationen Europas.

Doch Rhodos hat noch viel mehr zu bieten: eine mittelalterliche Festungsstadt etwa, Weltkulturerbe der UNESCO. Die Stadtmauern von Rhodos-Stadt umschliessen architektonische Meisterwerke und eine geheimnisvolle Stimmung. Im Südosten der Insel thront hoch über dem Meer die Akropolis von Lindos, eine der bedeutendsten Kultstätten der Antike, mit einer Aussicht, die einem den Atem raubt. Nachtschwärmern empfiehlt sich der Badestrand Faliraki mit seiner Ausgehmeile.
