CLOSING CEREMONY 2018-19

This year's magical trip to the world of learning ended with the usual spectacular closing ceremony, held, this time, at the Galatsi Indoor Stadium. Thousands of relatives and friends honoured us once again, rejoicing and enjoying the fantastic performances as they were presented by our children:

5th and 6th Graders

Dancing to classical music with a modern twist

Our 5th and 6th graders stole the scene, performing routines which combined the energy of today's youths with the classical approach, aiming to stress the importance of rediscovering old values and adapting them to the needs of today.

Mozart and Beethoven in both classical and modern versions, combined with a lively

choreography, made up a dynamic show with a difference.

The moving closure of the event, the farewell to our 6th graders, brought tears to the eyes of everyone present, as moments of yesterday came to blend with the hopes of today and the dreams of tomorrow.

Protoporia S.C. - Ellinoagliki Agogi
Something is going on in the deep blue.....

Our last year's little pineapples, took a dive in the deep blue this year because nowhere in the world is blue anything like the blue of Greece.
"Gliding underwater, I wonder what is happening in the most extreme depths, and then I let myself be lost down there....."
Have a nice trip our little...octopuses!

Carnival - The Lion's Dance

The team, consisting of 48 female and 2 male athletes, was formed in association with the

Shaolin Wu Kung Northern Suburbs Club, under the coach Konstantinos Mathiopoulos.

The show, which greatly impressed and enthused the audience with its originality and energy, started its journey in Thessaloniki, at the EGO WHITE TOWER FESTIVAL 2019, and it is expected to end it on the easternmost island of Limnos.

"At the crazy carnival, the lion is roaring, dancing to the beat out on the streets. Get up and dance with us. You only live once. ARE YOU READYYY ???"

By the 1st Graders

"Exotic Blend"

Dancing swing style. Our

1st graders danced to the modern cover of the popular 70's song and amazed us with their innocent grace and spontaneity.

"A little colour"

Circles and a little colour. This is what our 2nd graders gave us. Everything in life moves around love and colour and the beautiful choreography depicted it in the most graphic way.

"Becoming a child again"

Statues. Silent, motionless, solemn. And then....we wake up and turn into children. Children who are laughing and playing. Back into the state of statue again. And then.../ we become children again. Our 3rd graders showed us that all of us hide a child inside. No matter how much life has hardened us, our playful self is always there . It's up to us to discover it and bring it out.

PRINT3D: 3D PRINTING IN EDUCATION TO AID VISUALLY IMPAIRED STUDENTS

Ellinoagliki Agogi successfully completed the Erasmus+ Program «**PRINT3D: Promoting Inclusion Through Educational 3D Printing**».

Aim of this program was to introduce 3D printing technology in schools with special focus on the needs of visually impaired or blind people and, more specifically, students. Collaborating on this project were specialty teachers in the subjects of IT and English, alongside school teachers who first got acquainted with this new technology as well as familiarised themselves on the topic of Service Learning to promote inclusion in the educational environment. The implementation resulted in the production of 5 tactile maps and other 3D objects to cater for the educational needs of students with visual impairment.

The tactile map of the area surrounding the Olympic Stadium, including our school and the "Iriñi" train station providing information on streets, Olympic facilities and the surrounding area.

The tactile map of the Acropolis with a memo in Braille which allows people with visual impairment

to find and identify the basic monuments on the Acropolis rock.

The tactile map of various Mediterranean islands depicting their topography. With the sense of touch, the morphology of the landscape comes to life.

Furthermore, students and staff printed the

world renowned Caryatids of the Erechtheion. The maquette was set up exactly as

they are displayed in the Acropolis museum and detachable.

Finally, our school's participation in this project gave students the idea to print a 3D map of Europe.

The final outcomes of this project were presented in Valencia on the 13th and 14th of June 2019.

Apart from meeting the goals of this project, and upon its successful completion, 3D printing opens new horizons in education. This technology can be incorporated in many more subjects (Maths, Science, Geography, History to name a few) providing students with even more stimuli, skills and motivation to learn. The future is theirs!

Our team:

Kosta Krommydas, primary teacher and deputy-head of "Ellinoaglikli Agogi"

Giouly Papastavrou, IT teacher

Anna-Elizabeth Hunter-Ladia, English teacher and implementor of CLIL (Content Language Integrated Learning)

Yiannis Vretzos, primary school teacher

final where they were defeated by Leontios School basketball team.

In a six-private-school tournament, our young stars managed to qualify from Group A, securing second place after beating Lakoniki School and Giannopoulos School, smashing up the latter 109-9 !!!! after an amazing performance. The defeat by the tournament winners, Leontios, did not prevent our team from winning the dramatic semifinal against Paschalis School, who had come first in Group B. The final 44-42, and the way it was achieved, spread enthusiasm all through the school community and created great expectations for the final.

The subsequent defeat by Leontios 34-42 in the final, in front of an enthusiastic crowd of Ellinoaglikli 6th graders, did not detract anything from the importance of their achievement.

In a special ceremony on the school assembly, among cheers and applause, Mr Christos Kakadiaris honoured the team the way they deserved.

If there is something that these young fighters taught us, that is the importance of being defeated gloriously.

A MAGICAL TRIP WITH A GRACEFUL FINALE

Our Basketball Team's Glorious march

Our school basketball team continued a long

tradition of successful participation in tournaments, winning second place at the tournament organised by the Euroleague Academy, making it all the way through to the

CONGRATULATIONS!!!

FOR A LITTLE PUDDING

Our school's Drama club, "Kalio arga para argotera", had the pleasure to present the comedy entitled "For a little Pudding" based on

the play of Thordon Wilder, "Dolly the Matchmaker". Undoubtedly, it was the hit of a theatrical year full of thrilling moments .

Famous actors and actresses, honored us with their presence at the premiere, which was held at the theatre "Tzeni Karezi" and was widely covered by the press and social media. Sakis Rouvas, was the host of the glamorous evening who talked about how important is for art to promote and enhance solidarity and altruism.

Nantia Papailiopolou and Petros Spyropoulos along with the 18 members of the club, share a passion for theatre and the immense opportunities for self expression that it ensures. Yet, when the pleasure of acting is combined with the need for offering help, the outcome is notably rewarding. All the revenues from the 4 performances will be donated to the non-profitable organization "Kivotos tou Kosmou".

About the play

Yonkers store-owner Horace Vandergelder refuses to allow his niece, Eleonore, to marry Ambrose Kemper a talented, yet unemployed young artist.

Dolly Levi, the matchmaker, has arranged for Horace to meet Mrs. Irene Molloy, a New York City milliner, even though she secretly intends to marry him herself.

Cornelius Hackl and Barnaby Tucker, two of Horace's clerks, decide they deserve some adventure of their own, in spite of the fact that Horace has left them in charge of the store.

All the above mentioned characters take their chances in the dream city of New York which becomes the nucleus of the hilarious setting. Two last performances will be held on the 24th and 25th of June. See you there!!!!

A GREAT TEACHER INTO THE WATER!

The younger members of the theatrical team of the school presented a fresh performance full of dance and very funny moments!

While little Alice travels on the boat, she faces a rough sea. The boat sinks. A dolphin saves her and takes her to the bottom of the seabed but the other fish do not welcome her, as they believe that she is suspicious of horrible things! Alice thinks of a plan! "What if I become their teacher? If I teach them new things, I might manage to become their friend... So, she becomes a teacher in the water! Alice makes new friends, she laughs, she sings but most of all she learns what true friendship means. She manages to teach them how important it is to respect others in this world.

It was a meaningful theatrical performance

that gave us the opportunity to have fun and enjoy ourselves! Lucky to be there!

By the Pupils of C' class

"FASOULIDES"

"Ladies and Gentlemen" as the mosquito would say... "We are presenting to you the greatest love story between the old man Lord Kristombita, young and beautiful Mrs. Rozita,

her young lover Mr. Kokolikos and her ex lover Kourito." Fasoulides by Lork is one of the funniest stories presented by the pupils of D', E' and St' classes. Lorka's theme is "Love". "Love" that always wins. Rozita runs away from the awful old man Kristombita who had taken her from her father ages ago. She is getting married to her beloved Kokoliko now. Hypocrisy is another big theme that Lorka discusses since Kristombita turns out to be not human.

It was an amazing theatrical performance by the most talented actors! It was the greatest surprise for us to be there! Congratulations to everyone!

"THE SOCIAL GROCERY STORE"

GYMNASTRADA

Nature's awaking

Kids, their happy voices filling up the space like blooming flowers and smells that sweeten the air and the world around them. They attract tender looks, and they are favoured by the spring happiness of nature, birds and flowers and everything looks more optimistic and shiny.

Because as long as there are kids, animals and flowers everything is going to be all right!

They are the key to life, breath, the renewable source of energy of Aeolus.

Our big team, which has occupied top places in national and international events, consists of 30 female and 6 male athletes. Their goal is to convey an environmental message

We chose Aeolus, the god of winds who can get a windmill in motion when he blows really hard.

Our team wishes the best to all participants!

We all owe you a big "Thank you" for the power you have to transform the lives of people in need. Your offer at the Bazaar day was so huge that we hope we have improved people's lives even for more than a day! There was a wealth of plastic bags full of foodstuffs! We, the pupils of St' Class along with Mr. Kakadiaris visited the "Social Grocery store" where we offered all the foodstuffs you gave us at the day of the Bazaar!

We hope that you will keep on supporting us on such initiatives.

By the pupils of St' Class

"ON LINE GAMES AND SAFE INTERNET SURFING"

As requested by the parents of our pupils, Ellinoaglikí Agogí organized a Seminar on safe Internet surfing.

The goal of the seminar was to inform the parents about safe internet surfing since Technology is a great part of our everyday lives. It was conducted on the 18th of May

The Informative Event Schedule involved discusses such as "Online games through the eyes of the teacher", "Screens in children's lives", "Safe internet surfing" and "Addictive behaviors due to online games: The Fortnite case" . Psychologists and teachers took part in the seminar, such as Maria Dara, Helpline psychologist of the Greek Internet Center and Aggeliki Gianitsa, the psychologist of our school.

It was a really useful seminar that shed light on important issues that concern especially our parents.

By the pupils of St' Class

Life as simple as dancing wheat!

39 girls aged from 7 to 12 numbers our team. Silent dancing wheat that as soon as their dancing ends we can tell whether it ripens or not.

Golden wheat in fingertips standing to stare at the sky ... Make your life simple like a flute made of straw that can be filled with music.

The girls are wishing good luck to all the teams.

A cup full of frootlops -sugar free please.

Our team consists of 24 athletes who are the youngest in the club.

Frootlops in English, Cereal in Greek. No matter how they are called, colourful and full of life, they promise an unforgettable breakfast.

The ultimate recipe: a cup of sugar free cereal, a little bit of milk and lots of fun.

By the pupils of E' Class

3D PRINTING

Over the period 2017-19 our school participates in the European Program Erasmus+ "Promoting Inclusion Through 3D

Printing" (PRINT3D). This program (which consists of schools and partners, organizations from Spain, Latvia, Iceland and Greece) aims to research and develop strategies in order to integrate pupils and generally people with sight problems into the education process by utilizing the technology of 3D printing.

During this program students and teachers of our school began to use our 3D printer bringing the first results. 3D maps, monuments of classical Athens, signs in Braille writing, but also everyday items have already been printed and used either for charity at our school Bazaar or presented to our partners from other countries. Our school's participation in this program has resulted in the continuous training and familiarizing teachers with new technologies with the education benefits offered. Yet, our students are becoming aware, collaborating and creating structures with a view to their exploitation by their peers who are visually impaired. The 3D printing has delighted young and old alike, it has generated ideas and provided inspiration for the future!

By the pupils of C' Class

SPRING BAZAAR 2019

At the weekend of 11th and 12th of May the annual charity bazaar of our school took place on location. Undoubtedly, it was a huge success. The event that our school organized spread smiles to all the visitors, including families and individuals who joined our bazaar. It will also bring even more satisfaction and happiness to those in need and the charity organizations that the 6th graders of our school will decide to support.

In a pleasant, warm and enthusiastic atmosphere with a participation of visitors that surpassed any expectation, we managed to gather the amount of 11.206 euros as well as a lot of food supplies.

The doors opened early in the afternoon at 5 pm with the arrival of the first visitors. Soon, the whole school was full of enthusiastic people walking around, talking and laughing. Instead of them paying an entrance ticket, food was brought and collected at the entrances of our school. This food has already been delivered to the suburbs of the municipality in Pefki/ Likovrisi and that of Irakleio for the needs of poor families.

Those two days offered great joy and carefree moments not only to the children but also to the adults. Everybody had the chance to relax, have fun and spend time in a nice and lively atmosphere. The numerous stalls with the arts and crafts were ready early in the

afternoon while at the same time music was being played loudly by a DJ. Later in the evening, we had the chance to listen to the amazing music of the music band "JETLAG".

The well-known chef, called Selim Selcuc, participant from the last year's popular TVshow

"Masterchef", made his appearance on Saturday evening and spread enthusiasm to all the people who had the chance to take photos with him. His appearance helped our bazaar collect more money as he brought really delicious sweets that we could sell at our food stalls where the food from the English department was.

What we also enjoyed was the awesome and touching theatrical play that the 4th graders had prepared for their mothers. On Sunday it was Mother's day, so it was a great chance for the kids to surprise their mothers and dedicate this show to them. At the end of the play, all mothers were offered a red rose. The whole effort was organized by our Music teacher Miss Voulgari and our IT teacher Miss Gogo Tsesmeli.

In the playgrounds at the back of our school, there were four trampolines and a climbing wall which appealed to the young ones as well as other activities where you could take part and win a prize. For example, there was a basketball competition.

Some mothers of the fifth grade students had prepared homemade delicious lemonade which was also there for sale. Additionally, a big range of different kinds of food could be found in order to suit all people's

tastes. The Italian department offered coffee, the French one offered crepes, the German teacher made and sold typical hotdogs and German treats.

Another thing was the lottery in which you could win a big variety of things. The grand gift which surprised everyone was the three-days-stay in Aldemar Olympic Village, a 5star hotel in an all inclusive package.

On Sunday morning, in our school auditorium the students of the karate, ballet and gymnastics club presented their skills and were given their certificates of attendance.

The appearance of Mr Leonidas Koutsopoulos, the famous chef and judge of the TV show "Master Chef" was the highlight of our

event on Sunday morning. He had already prepared really elegant chocolate boxes that were also sold at the food stalls.

Finally, the talented boy break-dance group called "Art of show" performed doing some very extreme and dangerous moves. They were really amazing and their show was spectacular.

We would like to thank all of you for your support and contribution either by offering food or by buying our crafts or products for sale.

Special thanks are owed to all our classmates for everything they prepared and offered to this charity event.

We would like to express our sincere gratitude to all the school staff who worked very hard, beyond their scheduled work on a fully no profitable basis towards the successful outcome of this effort.

Last but not least, we would really like to thank our headmaster Mr Kakadiaris because if it wasn't for him, none of the above would have ever happened.

Due to all of you and your kind help and contribution, our school has managed to make little "miracles" come true for all those children and their families who really need to start believing in a future full of hope. We promise that we will never stop helping them.

MANY THANKS AND A BIG "BRAVO" TO OUR SCHOOL AND YOU!

By the 6th graders

MOTHER'S FIGURE THROUGH ART

The realization of a long-lasting, almost yearly cross curriculum Project is a fact in our school.

This year's Project was presented by D' Class. Their

aim was to work on the Project in cooperation to most of their teachers.

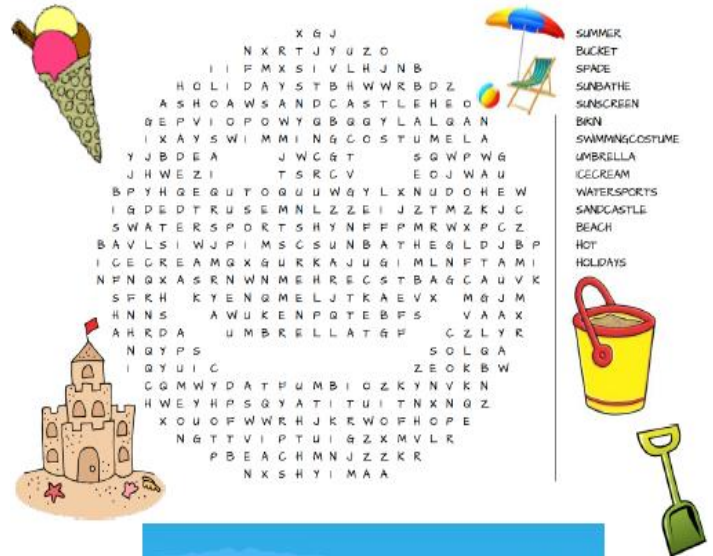

The aim of this effort is the holistic learning experience. The pupils learn to combine learning with every day lessons such as Poetry, Dancing, Theatre and Art.

This year's theme of the Project was "Mother's Figure through Art". It was presented on the 11th of May by the pupils. The audience was touched by the pupils' work which was inspired by various forms of Art!

Congratulations to all the kids and their teachers!

By the pupils of C' class

Summer Wordsearch

LITERATURE IN KINDERGARDEN!

We embarked on a journey in the magical world of Shakespeare as part of Literature themed day in April. We

discussed who the writer was, the difference between his comedies and tragedies and dealt with "A Midsummer Night's Dream". Fascinated by the magical creatures, we followed Oberon and Titania in the enchanted forest, but Puck soon became our favourite because of his mischief! We watched a short animation of the story and re-enacted the story. All in all it was a day of great fun and enchanted tricks.

FRANÇAIS

Nos petits se présentent!!

Moi, je m' appelle Andreas Anagnostou et j'habite à Pefki, à Athènes. J'ai 10 ans et j'ai une sœur. Je suis en 4^e de l'école Ellinoaggliki Agogi. J'adore l'histoire et le français! J'ai beaucoup de copains à l'école. À la récré je joue au foot et à cache - cache. J'aime beaucoup la musique et je joue du piano!

Andreas Anagnostou (D1)

Moi, je m' appelle Manto Anagnostou, j'ai 10 ans et j'habite à Pefki avec mon frère et mes parents. Je suis en 4^e de l'école Ellinoaglikiki Agogi. J'adore

l'histoire mais je déteste la langue. J'aime aussi le français ! J'ai beaucoup de copains à l'école. À la récré je joue au volley et à cache - cache. J'aime beaucoup la lecture et le cinéma!

Manto Anagnostou (D2)

MAX ET LILI ONT PEUR DES IMAGES VIOLENES

Au dernier trimestre on a lu le livre 'Max et Lili ont peur des images violentes'. Le livre parle de la violence dans les jeux vidéo. Les héros sont le

petit Max, sa sœur Lili et ses parents. Max est accro aux jeux vidéo, mais la nuit, il fait des cauchemars. Lili ne supporte pas les images violentes. Les images violentes nous rendent

insensibles et on est agités. La violence entraîne la violence et la haine. La violence provoque des dégâts. C'est dangereux!

Dans ce livre, nous avons aimé qu'à la fin les enfants étaient allés à la bibliothèque. Dans la bibliothèque, ils ont assisté à une scène de violence et ils comprennent que la violence est terrifiante. Après avoir parlé de la violence dans la classe, on a organisé un projet en équipe où deux journalistes posaient aux enfants des questions sur la violence et les enfants parlaient de leurs expériences. Ce projet a été présenté

au bazar de notre école car cela nous a plu et nous avons beaucoup appris.

Skouropoliakou Stella - Stamopoulou Eleonora (ST3)

VACANCES!!!

Mes meilleures vacances (par Alvanidi Artemis ST3)

L'été dernier nous sommes allés à Milos. J'étais avec mes parents. Milos était une île extraordinaire. Il y avait du soleil. On a loué une chambre et on était à la plage toute la journée. On a joué avec les vagues et on a nagé à la mer. On a aussi visité des sites archéologiques, on a découvert les traditions, on a goûté aux spécialités du coin. C'était inoubliable!!!

Cet été je visite Samos. C'est une île à la mer Egée à côté de la Turquie. Je visite Samos avec ma mère en août. On va voyager en avion. Tous les jours on joue avec les vagues, on fait des châteaux sur le sable et on pêche. Le midi on se repose!! L'après-midi on fait des promenades à Kokkari parce qu'on organise des boums. On offre de la viande, de la glace, du vin rouge et du jus d'orange. Cette fête s'appelle 'La nuit blanche'. On met des vêtements blancs et on y va. C'est super. On s'amuse. On écoute de la musique et on danse. Après, on lance des pétards. Il fait chaud. Je ramasse des fleurs et je les donne à ma mère. Samos est une île que vous devez visiter! C'est super chouette!

Stamopoulou Eleonora (ST3)
